PROFILE

Computer Engineering student at SPPU with a strong foundation in **C++** and a focus on **Systems Programming**. Experienced in building full-stack applications with **Django** and **React**, while currently specializing in **Operating Systems**, **Networking**, and **low-level memory management**. Proven track record of developing resource-efficient software independently and contributing to college technical teams. Committed to mastering system-level architecture to build high-performance software solutions.

EDUCATION

BE in Computer Engineering, CGPA - 8.2 till SE.

2027

Pimpri Chinchwad College of Engineering and Research (SPPU)

Relevant Coursework: Web Technologies, Database Management Systems, Software Engineering

PROJECTS

FarmHUB,

React.js, Node.js/ MongoDB

Working-SITE - <https://farmhubproject-nqxb9zhge.vercel.app/> 🌐

- Created a agriculture-related application •
- Designed UI with React.js for smooth user workflows.
- Integrated MongoDB for data handling (e.g. user data, farm records, etc.).
- Added Payment integration

Civic Echo

React.js, MySQL, Django

Working-SITE - https://manjeetkumar345.github.io/Civic_Echo/ 🌐

- Developed a community-driven platform to share civic issues and updates.
- Built responsive front-end using React.js. and Backend in Django.
- Used SQL database to store, manage, and query user reports and feedback.
- Added features like search, filtering, and user input forms to enhance usability.

Smart File Manager

C++, Filesystem API

- **Automated File Organization:** Developed a robust system utility in C++ that categorizes and migrates files into dedicated directories based on MIME types and extensions.
- **Storage Optimization:** Integrated a duplicate detection engine using checksum/hash-based comparisons to identify and remove redundant data, reclaiming significant disk space.
- **Resource Management:** Implemented "Large File Detection" algorithms to scan directories and flag high-capacity files for manual or automated cleanup based on user-defined thresholds.
- **Folder Analytics:** Engineered a folder analysis module that provides detailed statistics on directory composition, including file count, total size, and distribution of file formats.
- **Performance Focus:** Utilized the C++ Standard Library and efficient file-stream handling to ensure low latency during large-scale directory traversals and file operations.

CERTIFICATES

Microsoft Azure AI Fundamentals: AI-900

ORACLE Academy: Database programming with SQL

Build Responsive Real-World Websites with HTML & CSS: -Udemy

ACHIEVEMENTS/OTHER ACTIVITIES

- **Smart India Hackathon (SIH 2025):** Active participant in the national-level competition.
- **Technical Club Member:** Contributed to college website development and technical event coordination.
- **Mentorship:** Served as a mentor for junior students on web development projects.
